Question-5 What is affiliate Marketing?

Ans: Affiliate marketing is a performance-based marketing strategy where businesses pay affiliates (promoters) a commission for driving traffic, leads, or sales to their products or services. Affiliates use unique tracking links to promote products via blogs, social media, or ads, earning money when users complete specific actions like making a purchase.

1. Merchant (Advertiser/Business): The company that owns the product or service being promoted.
2. Affiliate (Publisher): The individual or organization that promotes the merchant's products or services using various marketing methods like blogs, social media, email, or paid ads.
3. Consumer (Customer): The person who purchases the product or service through the affiliate's promotional efforts.

How Affiliate Marketing Works:

1. The affiliate joins a merchant's affiliate program or a third-party affiliate network.
2. The affiliate receives a unique tracking link or code for promoting the merchant's products or services.
3. When a consumer clicks on the affiliate's link and completes the desired action (e.g., makes a purchase or signs up), the affiliate earns a commission.
4. Commissions are tracked using cookies or other tracking technologies.
